Summary

Throughout my 18+ years career as a web developer, I have had the privilege of working on numerous projects, developing over 40 web applications as a lead dev or as part of a team.

In recent years, my focus has been on e-commerce development within the Shopify ecosystem, specializing in React, Next.js, and modern headless architectures (Shopify Hydrogen, Nacelle). Proven track record of leading distributed teams, improving engineering processes, and delivering high-performance digital experiences.

One of the core aspects of my approach to web development is my willingness to embrace new technologies and techniques, even when I have no prior knowledge or experience with them. This drive to experiment and learn has allowed me to continuously expand my skill set and tackle complex challenges head-on.

A problem solver by nature.

Core Expertise

- Solution Architecture & System Design
- Headless Commerce (Shopify, Hydrogen, Nacelle)
- Technical Leadership & Mentorship
